(54) GARMENT OXYGEN-BASED BLEACHING AGENT IN DISCHARGE CONTAINER WITH FOAM-MAKING MECHANISM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a garment oxygen-based bleaching agent in a discharge container with a foam-making mechanism which contains an oxygen-based bleaching agent having excellent bleachability and capable of being directly coated on a stain on the garment.

SOLUTION: A garment oxygen-based bleaching agent is housed in a container having a foam making-mechanism and when coated in the form of a spot, the ratio of the height of the spot to the diameter of the spot is in the range of 0.1-0.5 and the ratio of the height of the spot one minute after coating to that at the time of coating is 0.5 or smaller. Further, the bleaching agent preferably contains an anti-foaming component.
